

## 姓名

李美玉, 女, 研究生学历, 理学硕士, 主要研究方向: 偏微分方程;  
符号计算。主讲数学分析, 高等代数, 高等数学等。

## 论文统计

1. Diversity of interaction phenomenon, cross-kink wave, and the bright-dark solitons for the  $(3 + 1)$ -dimensional Kadomtsev–Petviashvili–Boussinesq-like equation[J]. International Journal of Nonlinear Sciences and Numerical Simulation, 2022 (SCI)
2. Rational Wave Solutions and Dynamics Properties of the Generalized  $(2 + 1)$ -Dimensional Calogero-Bogoyavlenskii-Schiff Equation by Using Bilinear Method[J]. Advances in Mathematical Physics, 2021 (SCI)
3. Diversity of New Three-Wave Solutions and New Periodic Waves for the  $(3 + 1)$ -Dimensional Kadomtsev-Petviashvili-Boussinesq-Like Equation[J]. Journal of Applied Mathematics and Physics, 08(10):2142-2156, 2020
4. Study on exact solutions of a generalized Calogero - Bogoyavlenskii - Schiff equation[J]. Partial Differential Equations in Applied Mathematics, 2020
